15 Hoe Chiang Road, Singapore

### **A case study on New York Times Building by Mr Glenn Hughes**

Mr. Hughes has incorporated a number of innovative energy efficient systems in the New York Times new headquarters building in Manhattan. These include cogeneration, under floor air distribution, automated shade controls and a lighting controls system that features digital addressable dimmable ballasts and delighting. He will present actual data to show the stunning energy saving achieved there since its grand opening on November 19, 2007.

### **About Mr Glenn Hughes**

Glenn Hughes recently retired from The New York Times. During his final 8 years as Director of Construction and later as Managing Director of Construction, he directed the design, pre-purchasing, construction, testing and commissioning of The New York Times new headquarters. He now provides consulting and project management services with special emphasis on energy efficiency.

**RSVP by 26 Feb (Fri) to Ms Alicia Ho**
