LEADERSHIP IN GREEN BUILDING PRODUCT

Uniseal Creative Solutions Pte Ltd

Uniseal, an early contributor to the Singapore green building industry, developed its first proprietary green roof tray in 2006 and secured its first green building product certification in 2014, a first in the urban greenery industry. Uniseal has since transformed into an enabler of a sustainable built environment with a suite of 19 SGBP-certified products, 10 of which are in the “Leader” category, catering to a wider spectrum of the green building industry covering urban greenery, ecological management and green engineering.

Uniseal's green efforts continue by partnering with the Asia Pacific Region of the International Federation of Landscape Architects (IFLA-APR) to establish the IFLA ASIAPAC UNISEAL® RESILIENCE BUILDING FUND in 2018.
