

# BUSINESS LEADERSHIP IN SUSTAINABILITY IMPACT

CapitaLand places sustainability at the core of everything it does. Its sustainability journey started over 20 years ago. Today, CapitaLand is a well-recognised global real estate leader in sustainability, consistently included in prestigious rankings such as the 'Global 100 Most Sustainable Corporations in the World', 'Dow Jones Sustainability World Index' and 'GRESB'. Guided by its 2030 Sustainability Master Plan, CapitaLand is transiting to a low-carbon business that is aligned with climate science, with its ambitious carbon emissions reduction targets approved by the Science Based Targets initiative.

To amplify its sustainability efforts, CapitaLand launched the CapitaLand Sustainability X Challenge (CSXC), the first global sustainability-focused innovation challenge by a Singapore-headquartered real estate company. Selected innovations from CSXC 2021 are being piloted at CapitaLand's properties and the second CSXC is underway. CapitaLand has also set up a S\$50 million innovation fund, with at least half for sustainability projects, and the Smart Urban Co-Innovation Lab to support sustainability and other innovative projects. CapitaLand has raised over S\$8.4 billion through sustainable financing, and interest rate savings achieved will be redeployed to support more sustainability initiatives.
