

BUSINESS LEADERSHIP IN SUSTAINABILITY IMPACT

In line with the Keppel Group's Vision 2030, Keppel Land has placed sustainability at the core of its strategy and operations. The Company is committed to championing and leading the community in addressing climate change, greening the built environment, as well as delivering innovative solutions that create enduring value for its stakeholders – through environmental stewardship, responsible business practices and nurturing its people and the communities, wherever it operates. Keppel Land has committed to halve its absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 2025 from a 2020 base year, and achieve net zero by 2030; and reduce its Scope 3 GHG emissions from purchased goods and services by 20% per square metre by 2030 from a 2020 base year.

It is the first in Asia's real estate sector to set a near-term 100% reduction science-based target for Scope 1 and 2 GHG emissions. Under its net zero strategy, Keppel Land will continue to develop new high-performance buildings, optimise resource efficiencies of completed properties, tap renewable energy and purchase renewable energy certificates (RECs) to reduce the remaining unavoidable energy use. As at end-2021, Keppel Land has garnered 89 Green Mark awards, including one Platinum (Zero Energy), one Platinum (Super Low Energy) and 16 Platinum awards.
