

PROFESSIONAL LEADERSHIP IN SUSTAINABILITY

As Head, Sustainability & Resilience Office at Surbana Jurong, Praveen Hassan Chandrashekar is responsible for driving various sustainability initiatives and integrating sustainability strategies for major projects such as the Singapore Examinations and Assessment Board (SEAB), Surbana Jurong Campus, PSA Liveable City, Bedok Food City, strategic data centre projects and many more.

Praveen also leads carbon accounting for Surbana Jurong Group and has helped the organisation achieve both the RE100, a global corporate initiative bringing together businesses committed to 100% renewable electricity, and the World Green Building Council's Advancing Net Zero Carbon Buildings commitments. Praveen was the project lead for the "Maintainable in Design Appraisal System" (MiDAS), the world's first design tool to assess Design for Maintainability for new and existing buildings. The tool is now integrated into BCA Green Mark scheme. Praveen is also the co-principal investigator for a chilled ceiling project, an R&D initiative under SJ-NTU Corporate Lab.
