

# PROFESSIONAL LEADERSHIP IN SUSTAINABILITY

Venky Solaimalai has led the Lendlease team to be the industry leader in driving change and positive actions on the innovation and sustainability front.

He has enabled Lendlease to achieve industry-leading sustainability credentials for new building projects in Singapore, from PLQ to the more recent Shaw Tower and Certis Cisco headquarters, by leading studies to implement cutting edge innovations in technology and building services, such as AI driven energy intelligence solutions and Hybrid air-conditioning system with active chilled beam to raise the bar on energy efficiency.

Additionally, Venky led efforts to decarbonise construction by using Energy Storage Systems to phase out diesel generators, and for existing assets, leading a region-wide Solar PV opportunity study.
