

PROFESSIONAL LEADERSHIP IN SUSTAINABILITY

Winston Ho is leading a team of JTC engineers to look into ways to standardize and calculate both embodied and operational carbon for M&E systems of the built environment, that will contribute towards the unified carbon calculator in collaboration with BCA, SGBC and NUS-ESI.

His team is also studying the possibility of supplementing power demand with alternative clean energy sources for Electric Vehicle Charging (EVC) system to better support the infrastructure power requirements.

Winston has supported the national effort to import clean electricity for better sustainability. Finally, has also worked closely with BCA and GreenGovSG to implement changes to the JTC Green Lease Policy and the Industrial Government Land Sales (IGLS) program to champion for a more environmentally sustainable and productive developments in the built environment.

HO BOON CHYE WINSTON

Deputy Director,
Technical Services Division
