Distribution: Green Mark Professionals (GMPs)

## **LISTING OF GREEN MARK DATA CENTRE VERIFIED COMPETENCY IN GMP DIRECTORY**

### **Introduction of Green Mark (GM) Data Centre Verified Competency**

- 1 This circular announces the introduction of Verified Competencies for Green Mark Professionals' (GMP) personal profiles on the GMP Directory, with an initial focus on data centre expertise.
- 2 Data centres are resource-intensive facilities that necessitate greater emphasis on sustainability and efficient resource use. GMPs who are involved in the design, operation or management of data centres are encouraged to build advanced competencies by attending the Certification Course on Green Mark for Data Centres (GM DC:2024) conducted by BCA Academy.
- 3 GMPs who have completed the course may add GM Data Centre as a Verified Competency to their personal profiles on the [GMP Directory](#). This will assist stakeholders in identifying GMPs who have the in-depth technical skills to support Green Mark Data Centre projects and data centre sustainability efforts.

### **Requirements and Application Process**

- 4 The requirements to be listed with the Verified Competency of GM Data Centre are as follows:
  - i. Qualified GMA, GMAP, or GMAAP; and
  - ii. Completion of the Certification Course on Green Mark for Data Centres (GM DC:2024) conducted by BCA Academy

5 GMPs meeting the requirements may proceed to apply for the listing of GM Data Centre as a Verified Competency by following these steps:

- i. Log in to your GMP account at [the GMP portal](#)
- ii. Click the 'Add Verified Competency' button at the top of your Dashboard
- iii. Click the '+Add Record' button at the right-hand corner
- iv. Select 'GM Data Centre' Verified Competency, fill in the 'Date of Certificate', and upload the Certificate of Course Completion
- v. Click the 'Submit' button

6 SGBC will verify the authenticity of the uploaded document within 2 weeks of submission. GMPs will be notified via email thereafter of the successful listing, or if further action is required.

#### **Further Clarification**
